

Lorne Bremner

Vice President of Operations – Caliber Control Systems Ltd.

Mr. Bremner has been with the Caliber team since 2015. Lorne oversees and coordinates all Electrical, Instrumentation and/or Automation projects, be it Industrial or Commercial.

Lorne has twenty years of experience performing at all levels in the Electrical, Instrumentation and Automation Industry. He has worked as Project Manager/Coordinator executing the QA/QC of construction and maintenance projects, developing project proposals, estimates and resource planning. His skill set gives Caliber the ability to manage each project's progress, resources, budgets, schedules, information

requests and scope changes while at the same time ensuring the projects meet all quality, safety, and contractual requirements. Lorne works closely with internal and client health and safety teams to promote safety excellence at all levels and he works closely with project supervisors, technical leads and subcontractors to ensure each individual project's critical path is maintained.

Lorne has his Computer Automated Systems Technician Diploma from Thompson Rivers University. He also holds an Alberta Electrical Journeyman Certificate with Inter-Provincial Standard (Red Seal) from Southern Alberta Institute of Technology (SAIT) and in 2013 received the Gold Seal Certification for Project Manager through the Canadian Construction Association.
